Liquid Fertrell Plant Food is a fish emulsion product that has been carefully refined to meet our high standards of quality. It is low cost and basic in any liquid plant feeding program.

How to Use Liquid Fertrell

For corn and row crops: **Liquid Fertrell** should be placed in the row, close to the seed, with a squeeze pump or other liquid applicator, at the rate of 2 gallons per acre.

For tomatoes or other transplanting: **Liquid Fertrell** is best applied in the transplanting water, at the rate of 100 parts water to 1 part **Liquid Fertrell**.

Liquid Fertrell can be used as an effective foliar feeding by diluting 200 gallons water to 1 gallon **Liquid Fertrell**.
