

# Grandevo®

Grandevo® bioinsecticide is a premium insecticide that suppresses early in-season insect populations and provides broad spectrum protection against sucking and chewing insects and mites.

## **Benefits**

- Easy on beneficial insects
- Multiple modes of action
- Insect repellency
- Ingestion toxin
- Reproduction disruption
- No acute toxicity to adult honey bees
- OR, WA, NV, CO Approved for Cannabis Pesticides Listing

## Basic Use Instructions

**When populations of broad/russet mites are high, we recommend 6 tbsp/gallon of Grandevo.**

-Apply before insect and mite populations start to increase.  
No spray buffer required.

-Apply 2 to 4 tbsp./gallon per 1000 sq. ft. Apply at a 7 day interval.

## **Key Pests in Medical Marijuana**

- Mites (including broad mites, russet mites and spider mites)
- Aphids (including root aphids)
