**Effective Chemical Free Weed Control!**

**Blocks weeds NATURALLY!**

- Allows air and water through
- Made from natural cellulose fiber
- Gradually decomposes
- Lasts a full growing season
- No clean up, tillable into soil

WeedGuard® gives plants a stronger, earlier start.

Effective Chemical Free Weed Control!

- Blocks weeds NATURALLY!

**Installation Tips:**

1. Do NOT lay out on windy days
2. Take all the tension off the WeedGuardPlus rolls. Roll should unwind freely.
3. If you are using a 3 point hitch – TAKE ALL THE “SWAY” OUT
4. Trailing pneumatic tires need to be perfectly vertical and be aligned on the outer 2” of the WeedGuardPlus
5. After setup is complete, try laying out the WeedGuard.
6. Usually the wheels need adjustment (up, down, in, out); Wheels: NO tilt, NO angle, NO pressure

**NOTE:** Product may be affected by variances in weather or soil conditions.

WeedGuard®

Organic Formulation
Suitable for Certified Organic Production

Easy to use, 100% biodegradable WeedGuard® gives plants a stronger, earlier start.

Effective Chemical Free Weed Control!
Blocks weeds NATURALLY!

- Allows air and water through
- Made from natural cellulose fiber
- Gradually decomposes
- Lasts a full growing season
- No clean up, tillable into soil

Installation Tips:
Hand Laying of WeedGuardPlus

1. Do NOT lay out on windy days
2. Place roll on ground. Place a heavy stone on each corner as you start to unroll the WeedGuardPlus
3. You can put a long pipe or broom handle through the core of the material to assist in unrolling
4. Unroll slowly and toss soil along both edges. We recommend 4” – 6” of soil on the edges to prevent wind from blowing the material away
5. When you reach the end of the crop row, cut the roll and place soil on the edge
6. Remove the heavy stones and place soil on the edge
7. Cut an “X” into the material where you want to plant, fold back the corners, and plant as you normally do
8. Fold back the material where you’ve made the “X” cut and water
